

Muhammad Azhar

Associate Software Engineer

With over one year of hands-on experience in ReactJS and TypeScript, I have developed and maintained dynamic, responsive web applications, focusing on clean code and robust architecture. I have a strong understanding of component-based development, state management using tools like Redux, and integrating APIs for seamless user experiences. Additionally, I have basic experience in Node.js, enabling me to handle server-side logic and develop simple back-end functionalities to support my front-end applications. My skills in both front-end and back-end technologies make me a versatile developer capable of working on full-stack projects.
